

Planning Permission

Conversion to Flats

The client contacted us regarding a proposed conversion to flats.

Following a planning appraisal, it was determined that the project was feasible and would require full planning permission.

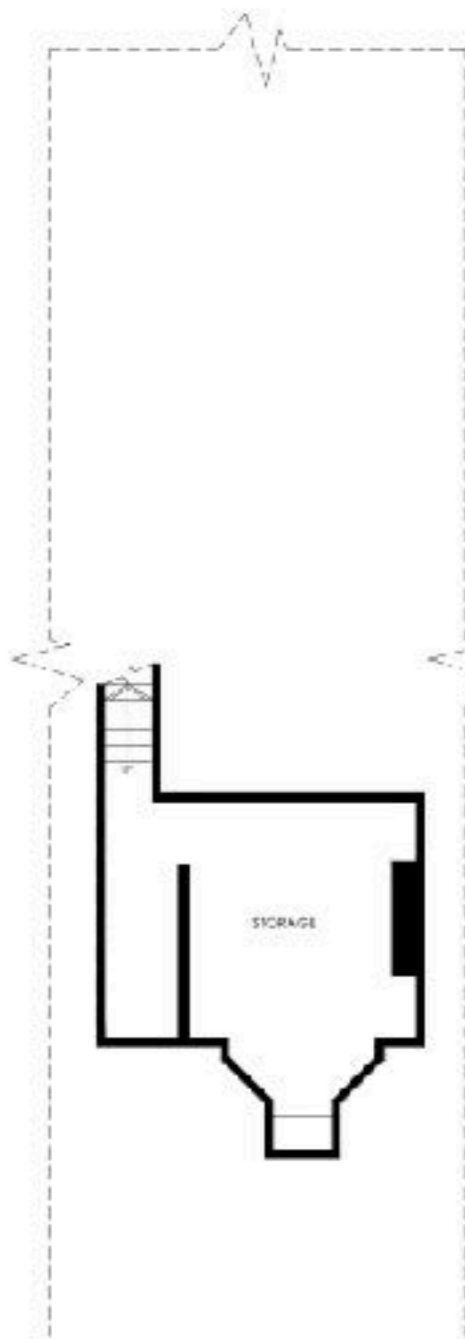

One of our chartered architects produced the required architect drawings, which the client approved. Following approval of the architectural design, one of our chartered town planners prepared the required planning statement, to justify why the council should approve the application.

With the client's approval an application for full planning permission for a conversion to flats, together with the architect drawings and planning statement has been submitted. Planning Permission has now been approved for the conversion to flats.
